## **BIOGRAPHY**

Getting a passion for film from an early age it wasn't until late in life I took the plunge and followed my dreams, I work hard I know my place on set, and I'm good at what I do, I study none stop and I help others if I can I like to champion people and help them to find a home in the film industry as well.

I love horror from a lighting perspective, but I like to drama from a narrative aspect, I love working as a Gaffer but, I would like to slowly push into cinematography in the future.

I'm industry proven but my thirst for learning never ends and I don't want to learn everything, But I want to be learning something new every day. I'm not a trained electrician but I do know my way around repairing tungsten lights, I can solder, weld and lift well over 50kgs if its needed.

---
